■ API Endpoints

API Name	Method	Endpoint	Description
Register	POST	/api/auth/register	Register new employee
Login	POST	/api/auth/login	Authenticate user
Punch In	POST	/api/attendance/punchin	Record punch-in time with face + geofence
Punch Out	POST	/api/attendance/punchout	Record punch-out time with face + geofence
Get Attendance	GET	/api/attendance/:id	Fetch attendance record
Performance	GET	/api/performance/:id	Track employee performance
Leave Apply	POST	/api/leave/apply	Apply for leave
Leave Status	GET	/api/leave/status/:id	Check leave status

■■■■ Developer Notes

- Use Axios to call all above APIs.
- Store API keys in .env.
- Implement geofencing using browser GPS.
- Integrate face recognition using webcam API.
